Team 3313 Iteration Plan

Sprint	Weeks	Sprint Goal	Relevant User Stores/Features
1	1-3	Dashboard, Upload Documents, and Account Storage	• As a verifier, I want to upload a document from my local storage so I can initiate the verification process. • As a registered user, I want to be able to log in to the app so I can view information specific to me. • As a registered user, I want to be able to log out of the application so I can ensure that nobody else can access my personal information. • As a registered user, I want to be able to view my most recently uploaded documents so I can begin to validate them.
2	4-6	Run Validation and Administrator Privileges	• As a verifier, I want to automatically validate the document so I can get a preliminary validation without manual work. • As a verifier, I want to view the validation results so I can ensure that they are accurate. • As an administrator, I want to be able to view all accepted documents so I can classify registered users as cleared personnel if necessary.
3	7-9	Override or Accept Validation Outputs	• As a registered user, I want to view the validation results for a selected document so I can know whether it was rejected or accepted. • As a verifier, I want to be able to accept documents that are inconclusive from the automatic validation so I can make sure that they can be manually verified by a verifier. • As a verifier, I want to override and update any validation results so I can ensure that the document is correctly classified.
4	10-12	Filtering Dashboard, Document Type, Document Deletion	• As a verifier, I want to select the department or type of form for the document so I can ensure that the documents are organized appropriately. • As a verifier, I want to be able to filter the dashboard based on document type so that I can verify multiple similar documents at the same time.

			• As a verifier, I want to be able to delete documents in case I accidentally upload the wrong document.
5	13-15	Annotations on Documents, Administrator Access	• As an administrator, I want to be able to add new registered user accounts to my organization so I can initiate their document validation processes. • As a verifier, I want to be able to make annotations/highlights to a document so I can let registered users know why any documents did not pass. • As an administrator, I want to be able to remove any registered users from my organization so that my list of authorized users can be updated in case one of my employees decides to leave.
